

Young Chang

✉ youngchang1005@ewha.ac.kr | 🏠 paintedblue.github.io | 🎓 Google Scholar

Research Interests

My research explores how AI and robots shape human behavior and social interactions in everyday life. I am particularly interested in designing interactive systems that support young children’s development.

Education

Ewha Womans University	2025.09 – 2027.08 (Expected)
M.S. in Computer Engineering (Advisor: Prof. Uran Oh)	
Chungnam National University	2021.03 – 2025.08
B.S. in Computer Science and Engineering (Advisor: Prof. Jaejeung Kim)	

Publications

CHI EA ’26	HabitTune: AI-Generated Personalized Children’s Songs for Positive Habit Development <u>Young Chang</u> , Haejin Park, Uran Oh [†] , Jaejeung Kim [†]
IEEE IRI ’26	A Guideline-Based Approach for Creating Personalized Storybooks with Generative AI Jiseon Yang*, Dahee Lim*, Jinyoung Huh, <u>Young Chang</u> , Uran Oh [†]
ICTC ’23	ChatGPT Powered Digital Healthcare System Jaeyong Lee, Gyeyoung Jung, <u>Young Chang</u> , Yuju Kang, Jaejeung Kim [†]

Research Experience

HCI Lab, Ewha Womans University	2025.09 – Present
Graduate Researcher (Advisor: Prof. Uran Oh)	
• AI-Generated Personalized Media for Children’s Daily Routines – HabitBuddy (first author, under review): Led the design, development, and evaluation of a system combining personalized AI-generated songs and character videos to support preschoolers’ daily routines. – HabitTune (first author, CHI EA ’26): Led the design, development, and evaluation of a system generating personalized AI songs to support children’s positive habit development. • Customer-Robot Handover in Commercial Delivery Services (co-first author, under review): Analyzed commercial robot delivery data to examine how customer behavior and operational conditions shape handover interactions. • Design Guidelines for AI-Generated Personalized Storybooks (IEEE IRI ’26): Conducted user interviews and surveys, and performed qualitative analysis to inform guideline development. • WhiteCane: Robot-Assisted Navigation for People with Visual Impairments: Developed a user interface for a VLM-based indoor-outdoor robotic navigation system.	
Ewha Womans University	2026.03 – Present
Research Assistant (Advisor: Prof. Hyunseok Park)	
• Interpreting and Translation Training Platform (TalkTrack): Maintained a web-based translation platform, including bug fixes, server management, and SSL certificate renewal.	

WellCom Lab, Chungnam National University

2023.03 – 2025.02

Undergraduate Research Intern (Advisor: Prof. Jaejeung Kim)

- **AI Proxy Agent for Smartphone Self-Regulation (PCA):** Conducted user interviews and qualitative analysis to explore users' perceptions of an AI agent that responds to smartphone self-regulation prompts on their behalf.

UX Lab, Seoul National University

2023.01 – 2023.02

Undergraduate Research Intern (Advisor: Prof. Joongseek Lee)

- **UX Research for Shared-Housing Laundry Services:** Conducted UX research and proposed app features to support laundry management for shared housing residents.

Work Experience

Statistics Korea

2025.03 – 06

Intern, Statistics Service Innovation Promotion Division

- Built data for KoBot, Statistics Korea's AI chatbot, including document layout analysis (DLA).

Teaching Experience

Ewha Womans University

2026.03 – Present

- **Computer Graphics** (Undergraduate, 100+ students), Fall 2026
- **Java Programming and Lab** (Undergraduate, ~30 students), Spring 2026
Graded assignments and exams, led lab sessions, answered student questions, and assisted with final grading.

Honors and Awards

2026.08	Excellence Award (3rd Place) , Ewha Three Minute Thesis (3MT) Competition Presented the HabitBuddy research; prize of KRW 800,000 (≈ USD 570).
2026.03	Academic Activities Support Scholarship , Ewha Womans University Awarded for presenting HabitTune as a poster at CHI 2026; KRW 1,000,000 (≈ USD 710).
2025.09 – 12	Brain Korea 21 FOUR Scholarship , Ministry of Education, Korea Graduate research stipend from Korea's national Brain Korea 21 FOUR program; KRW 6,000,000 (≈ USD 4,300).
2025.09	Excellence Award (2nd Place) , Statistics Korea Youth Intern Joint Project Achievement Conference Ranked 2nd among 6 teams for a project improving the UI/UX of KoBot, Statistics Korea's AI chatbot.
2024.11	Grand Prize (1st Place) , Chungnam National University Public Data Utilization Competition Awarded for <i>Map for All: Barrier-Free Campus Map</i> ; prize of KRW 900,000 (≈ USD 640).

Skills

Research Skills	Field Deployments, User Studies, Interviews, Surveys, Statistical Analysis (SPSS), Log Data Analysis, Qualitative Coding, Thematic Analysis
Technical Skills	Python, JavaScript, TypeScript, Java, HTML/CSS, React, React Native, Flutter, Firebase, MongoDB, Node.js, GitHub, Figma

Student Club Activities

LabHER, Ewha Womans University Startup Club

2026.03 – Present

Working on commercializing HabitBuddy.
